

HYDROKON

ELECTROSTATIC

ONLINE WATER SCALE PREVENTER

Think water... Think of us

sales@hydroelectrostatic.com, Info@hydroelectrostatic.com
www.hydroelectrostatic.com

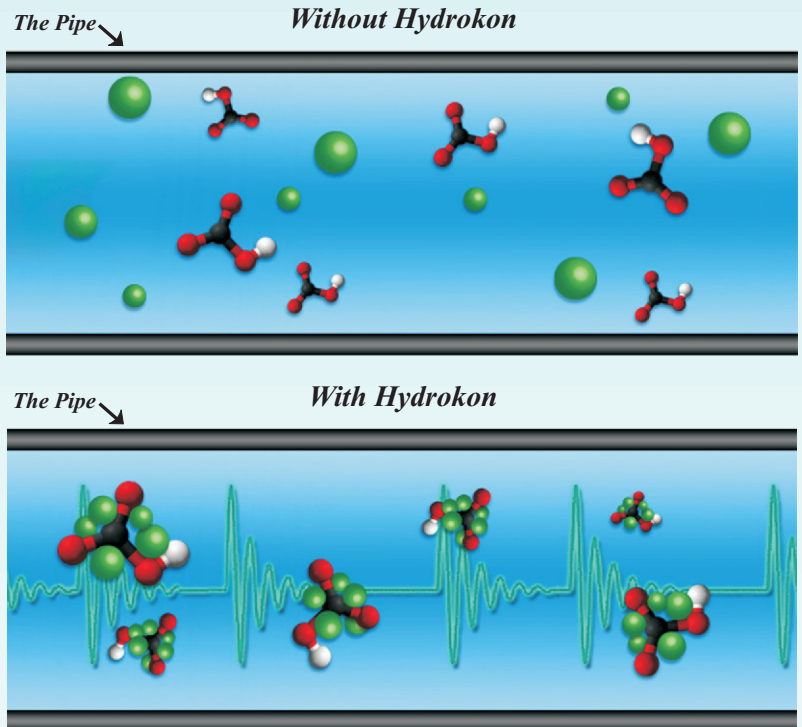

BENEFITS

- No - Hard Water Scale Permanently
- No - Conventional Regenerating Softeners for Cooling Tower
- No - Expensive Descaling Chemicals
- No - Excess Energy Consumption
- No - Forced Shutdown Required for Cleaning of Scales
- Dual Action Assured – Prevention & Removal of Existing Scales

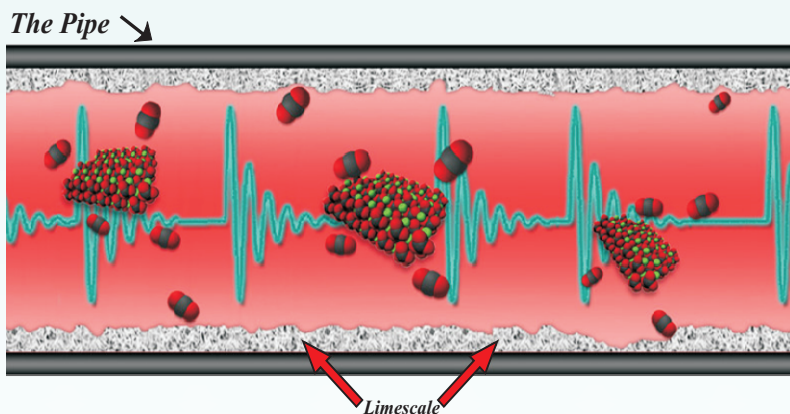

SAVES MONEY. LOW PAYBACK PERIOD

APPLICATIONS

- Air Conditioning Plants
- Condensers
- Cooling Towers
- Cold Storage
- Chemical Industries
- Distilleries
- Evaporators
- Heat Exchangers
- Hot Water Generators
- Injection Moulding Machines
- Ice Making Machine
- Pharmaceutical
- Power Plants

How existing scale is removed with Hydrokon

Hydrokon treats fluids by inducing a electrostatic field of 7k to 12k DC volts, yet harmless fields throughout plumbing pipe lines/systems made of any material, including PVC. When the Hydrokon signal is present, dissolved minerals combine to form loosely held clusters.

When the clusters precipitate out of solution, they form stable calcite crystals that do not accumulate as hard scale.
